Ou expenditure side inferest on debt and any payments to a sinking fund should be included in ordinary expenditure and all experiments from large grants (other than ordinary) for schemes of local improvements should be shown separately. In ordinary stream to all important variations, if any, in the amount of revenue and expenditure. Further details should be given as required on the revenue.

In addition to the details required on the reverse, clear information should be given below under the following heads:—

(a) If the ordinary surplus is sufficient to meet the charges of the proposed loan, the particular steps which the municipality has taken, or has agreed to take, in order to make good the deficiency.

(b) The reserve of taxation or other possible means of increase in the revenues of

the municipality.

- (c) A statement of all outstanding loans specifying in respect of each loan the date when taken, the purpose very briefly, the amount, the annual charges involved, and the amount still payable.

A water tax will yield sufficient amount to meet the charges of proposed loan. Rupees 24,000 will be the expected income which will be sufficient to meet both the remaining and loan charges.

Installation of water-supply scheme will possibly improve the sanitation of Krishnagar, so people will build new houses which will go towards the increase of income.

There is no outstanding loan.

The receipt of water tax on the whole will show a tendency to rise after completion of water-works scheme, as it is expected many people will come back to their ancestral houses who have left for malaria, etc.

MUNICIPAL AND LOCAL.

NOTIFICATIONS.

No. 1249M.—The 17th April 1920.—In pursuance of section 37F. of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), it is hereby notified for general information that the scheme submitted by the Commissioners of the Budge-Budge Municipality, in the limit of the 24 B. in the district of the 24-Parganas, for providing flood flush drainage of that municipality has been approved by the Governor in Council and that the particulars of the said scheme are as follows:-

(a) The town of Budge-Budge is situated on the left bank of the river Hooghly and lies within its tidal reach. During the rains the tide rises as high as 20000 and falls to as low as 6000 and the ordinary tide is about 17:50. The average ground level of the town ranges between 17:00 and 21:00 and there is a protective embankment with sluices along the bank of the river. The roads are mostly embanked and high, except in a few places the roadside drains are deep and wide. There are innumerable insanitary tanks and ditches within the town. A surface drainage scheme was prepared by the Sanitary Engineer, Bengal. In this scheme the silt-laden water introduced through sluices when the river is in flood circulates through the low places in the town, and drains out the water when the river is low. Provision has been made for the construction of the necessary regulators and sluices and for improving the bed of the existing drains, making them pucca where necessary.

(b) The estimated cost of the scheme is Rs. 28,070, excluding the cost of

acquiring lands on the side of the drains amounting to Rs. 1,178.

(c) The estimated cost of the maintenance is Rs. 250 per annum.
(d) The sum of Rs. 29,248 on account of the cost of the scheme will be met as follows :-
